Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 July 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Status of Claims

1. In the Amendment dated 07/14/2005, no claims have been added or cancelled; therefore, Claims 1-6 remain pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suda (US 6718240) in view of Hsu (US 6100811).

In reference to Claim 1, Suda discloses a remote keyless entry system wherein claimed detecting means met by remote keyless entry unit 111, see Fig. 1 and Col. 4 lns 48-54; claimed personal authentication processing means met by controller 217, see Col. 5 lns 11-22; claimed registration storing means met by memory 219, see Col. 5 lns 23-25; claimed door lock controlling means met by inherent door lock controller since user interface system 119 is used to access and set door lock and unlock, see

Art Unit: 2632

Col. 4 lns 13-23; claimed setting status controlling means met by vehicle interface unit 119, see Col. 4 lns 13-23. Suda does not disclose personal authentication information and personal ID of each person. However, Hsu teaches of a fingerprint actuation of customized vehicle features wherein a sensed fingerprint images is compared with stored reference fingerprints to verify the identity of the user and retrieve user environmental settings, see Col. 1 lns 46-67 and Col. 2 lns 1-6. Hsu further teaches that the apparatus further comprises means for obtaining and storing reference fingerprint image data and environmental settings pertaining to additional users, see Col. 2 lns 37-39 and lns 55-60. Therefore, one having ordinary skill in the art at the time the invention was made would have incorporated the teachings of Hsu into the system of Suda because authenticating the information and ID of each person adds to the overall security of the system and identifying and storing the identification and environmental settings for each user adds to the overall comfortability and convenience of the multiple drivers of a single vehicle.

In reference to Claim 2, see above rejection in reference to Claim 1. In addition, claimed communicating means met by wireless transmitter 205 and receiver 215, see Col. 4 lns 38-47.

Art Unit: 2632

In reference to Claim 3, see above rejection in reference to Claim 1. In addition, Suda discloses that user interface unit 119 is used to access and set settings for the door lock and unlock, keyless entry, power window, interior lighting, head lamp, warning indicator, trunk entry, alarm system, suspension, traction control, audio, video display, navigation, communications equipment, and climate control. Some settings, such as those of the seats, mirrors, and radio station presets, can be set directly in the course of their use.

In reference to Claim 4, see above rejection in reference to Claim 3. In addition, the mirrors are set in the course of their use and programmed into memory according to driver-specific identifications, see Col. 5 lns 58-60.

In reference to Claim 5, see above rejection in reference to Claim 3.

In reference to Claim 6, see above rejection in reference to Claims 1 and 2.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is

Art Unit: 2632

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
